**Place:** OGMCOAL

Hi Gina,

I looked over the map with Wayne Western and we came up with some suggestions of information we'd like to see on the as-built map.

The as-built map should depict the following information: all of the drainage ditches on the site, the roads (which we understand you're working on), the parking lot outside the office building as well as the permit boundary. In addition, a legend that denotes these items should be added to the map as well. The equipment layout you've depicted will work.

I hope this helps. Please call me if you have any questions/concerns.

Thanks Gina,  
Steve

Hello Steve,

We have a first draft of the survey that was done on our Wellington plant. We need the surveyors to finish adding the roads to the map, but I wanted to check with you to see if you or any of the others reviewers need any additional information added to the map. One question that we have for you, do we need to show a detailed equipment layout or is what shown on this drawing sufficient?

Thank you,

Gina

Ron:

Attached is the draft copy of the survey in pdf format. Please take a look at it and see if you want any changes.

Tom

Tom,  
Please advise on the survey progress.  
Thanks,  
Ron S

Ron:

Attached is the proposal for completing an "as-built" drawing of your Wellington site. I have instructed the surveyors to start on this project. Please let me know if you have any questions.
